

## RESEARCH OUTCOMES GRANT Guidelines

The Research Outcomes Grant (ROG) is intended to facilitate the production, not the dissemination, of research results and contributions. The ROG provides a one-time research support to faculty who do not currently hold research funding. The ROG enables extra funding for research undertakings that do not require significant or lasting support. The ROG is not a substitute for external funding resources and faculty members are expected to make every effort support from external granting agencies for their research projects and programs. The ROG award (up to \$1,000) is administered through the Office of Research Services.

All funds must be used within six months.
