Writing Course Learning Outcomes

Learning outcomes are clear statements that describe the competences that students should possess upon completion of a course (Simon and Taylor, 2009; Anderson et al., 2001; Harder, 2002; Kennedy, 2007). Effective learning outcomes state what students should know and be able to demonstrate, as well as the depth of learning that is expected. Clearly defined and intentionally integrated course learning outcomes can: 1) help to organize, structure and enhance student learning; 2) improve communication with students and other instructors regarding the important concepts and skills covered in a course; and, 3) improve assessment practices (Simon and Taylor, 2009). Learning outcomes are often presented separately in the cognitive, psychomotor and affective domains (Table 1), but may also reflect a range of interacting knowledge, skills and attitudes (Harder, 2002; Soulsby, 2009). Based on various situational factors and contexts, courses typically contain 5-8 broadly stated learning outcomes that represent a graduate’s integrated and essential learning within the course.

Table 1: Domains of learning, with example levels of sophistication and common verb associations

<table>
<thead>
<tr>
<th>Domain of Learning</th>
<th>Levels of Sophistication</th>
<th>Common Verb Associations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cognitive (Knowledge)</td>
<td>remembering, understanding, applying, analysing, evaluating, creating</td>
<td>define, identify, describe, differentiate, explain, apply, analyse, resolve, justify, recommend, judge, create, design</td>
</tr>
<tr>
<td>What will students know?</td>
<td>imitation, manipulation, precision, articulation, naturalization</td>
<td>adapt, arrange, build, calibrate, construct, design, deliver, demonstrate, display, dissect, fix, mimic, operate, sketch, use, perform</td>
</tr>
<tr>
<td>Psychomotor (Skills)</td>
<td>receive, respond, value, organize, characterize</td>
<td>ask, challenge, demonstrate, discuss, dispute, follow, justify, integrate, practice, judge, question, resolve, synthesise</td>
</tr>
<tr>
<td>What will students be able to do?</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Affective (Attitudes, Values or Habits of Mind)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>What will students value or care about?</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

How do you write a learning outcome (LO)?

The LO should:

- Start with an action verb, followed by a statement specifying the depth of learning to be demonstrated, and finally a statement to give it disciplinary context and/or link to activities and assessments.

- Be specific and unambiguous. Terms such as know, understand, learn, appreciate, and to be aware of should be avoided, and the specific level of achievement should be clearly identified.

- Focus on observable student outcomes.

| action verb to identify the depth of learning expected (e.g. identify, explain, apply, analyze, evaluate, create) + statement specifying learning to be demonstrated (e.g. what?) + statement(s) to give disciplinary context or state how learning will be achieved (e.g. about what? why? how?) |
performance, and be capable of being assessed. It is often helpful to add the
preposition “by” or “through” followed by a statement which clearly states how the
LO will be assessed.

- Be balanced. Broad LOs are difficult to assess, while an extensive list of learning
  outcomes will limit flexibility and adaptability in the curriculum, and make it
difficult for students and the instructor to communicate an integrated understanding
of the subject matter.
- Be concise and clearly stated.
- Be achievable given the time and resources available to both learners and
  instructors.

See Kennedy (2007) and Soulsby (2009) for additional details and examples related to
writing effective course learning outcomes.

Table 2: Before and after examples of course learning outcomes

<table>
<thead>
<tr>
<th>Before: broad and ambiguous</th>
<th>After: direct, measurable and achievable</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>By the end of the semester, successful students will be able to:</td>
</tr>
</tbody>
</table>

- **Students will become familiar with plant and animal species in Southern Ontario**
  - Level of achievement/sophistication expected unclear
  - Identify and describe 15 common plant and animal species found in the Carolinian Forest Region through field study and the development of an identification guide

- **Students will critique works of art**
  - Additional detail required
  - Critique contemporary works of art based on an appropriate set of criteria through studio critiques and an independent essay

- **Students will be taught various decision-making models**
  - Teacher-centred, level of sophistication expected unclear
  - Apply appropriate decision-making models in business and marketing through participation in a collaborative group project

- **Students will appreciate the ethical responsibilities of social scientists**
  - Too broad, unclear how this can be measured
  - Assess the ethical implications of research in the social sciences through in-class discussion and an independent written report

- **Students will learn about research proposals**
  - Ambiguous, level of sophistication expected unclear
  - Develop and present a research proposal (including appropriate research methods and a review of literature) on a relevant topic in primary or secondary education, through an independent presentation and written report
