

MATH 2326

ANISHINAABEK WAY OF LIFE AND MATHEMATICS WITH APPLICATIONS

When we understand that Indigenous people have geometry, we understand that the creation of a canoe or a berry basket is a very complex procedure that requires the utilization of Indigenous shape categories.

This course is a great opportunity to merge your mathematics knowledge with traditional Indigenous activities and explore the ways the mathematics concepts have been applied since time immemorial.

- ◇ Establish confidence while learning Anishinaabek ways of teaching, knowing, and learning.
- ◇ Learn to demonstrate a basic knowledge of key concepts in mathematics and applications from an Anishinaabek perspective.
- ◇ Learn to evaluate key mathematical and scientific concepts as they appear in Anishinaabek teaching and learning.
- ◇ Learn to analyze the purpose of the use of mathematical concepts in Anishinaabek ways of life.
- ◇ Engage in a variety of written, oral and creative activities.
