

Welcome to the On-Campus Bachelor of Science in Nursing (BScN) Program at Nipissing University.

On behalf of the School of Nursing, I would like to congratulate you on your acceptance and extend a warm welcome to our community. We are delighted that you have chosen Nipissing University for your nursing education.

Nursing is a challenging yet rewarding profession. Over the next four years, you will develop the knowledge, skills, and professional values required to practice safely and competently as a Registered Nurse. Our faculty and staff are committed to supporting your academic success and professional growth as you prepare to enter an ever-evolving healthcare environment.

As you prepare for the start of the program, please review the materials included in your registration package carefully. Clinical placements are a mandatory component of the BScN program, and all students are required to complete the initial clinical clearance requirements, including the Communicable Disease Screening Form. These requirements are mandated by our clinical partners and regulatory bodies to ensure the safety of students, patients, and healthcare teams.

You will also receive information about Summer Student Orientation, which will provide an opportunity to meet faculty, staff, and fellow students, learn more about the nursing program, and ask questions as you transition into university life. We strongly encourage you to participate, as Orientation is an important part of starting your journey with confidence.

Beginning a nursing program is an exciting milestone, and we recognize that it can also feel overwhelming at times. Please remember that support is available to you throughout your studies. Should you have questions regarding your program, clinical clearance requirements, or next steps, do not hesitate to reach out to the appropriate contacts listed in your package.

We look forward to welcoming you to campus and working with you as you begin your studies in the Nipissing University BScN program.  
Sincerely,

**Scott Fitzgerald BScN, RN**
